

Arrests in shooting

Mustang Daily—Kris Angell

ARRESTS ANNOUNCED —George Whiting, county sheriff-coroner, and University Police Chief Richard Brug

announced Thursday the arrests of two suspects in the fatal shooting of Cal Poly's Head Librarian Dr. Norman

D. Alexander which occurred Monday. Whiting announced the arrests had been made Thursday morning at a car

rental agency in the San Diego area. The suspects were the husband and son of a female library employee.

Husband, son of library employee in custody

BY PAMELA RAMSTRUM

Daily Staff Writer

The husband and son of a Cal Poly library employee have been arrested in the fatal shooting of head librarian Dr. Norman Alexander, the sheriff's department announced Thursday.

Sheriff George Whiting said police arrested Howell Petrey Harris, 54, and his 17-year-old son, both of Pismo Beach, at 11 a.m. Thursday in San Diego.

Harris' wife Mary is officially employed in the library although she has not worked there for "sometime," police said. They would not say when she worked last. She was hired in 1969.

Sheriff Whiting said his department, which is conducting the investigation with the university police, had enough evidence Wednesday to obtain a warrant for the Harrises for attempted murder. Because Alexander has died from a gunshot wound received in a campus parking lot Monday, the warrants were changed to read murder, Whiting said.

Harris and his son left San Luis Obispo in a rented truck, Whiting said, and were arrested Thursday morning in a San Diego car rental agency. There was no indication of resistance to the arrests, Whiting said. They are being questioned in San Diego and will later be transported to the San Luis Obispo County Jail by Cal Poly police officers and sheriff's deputies, Whiting said. No bail has

been set.

The older Harris had been known by police to be posing as a physician, using the alias Howard Harris.

Police said Mary Harris and a 14-year-old son left San Luis Obispo at the same time as her husband and older son, but they do not know her present whereabouts. Police said they are looking for her and her son but no warrants have been issued for their arrests.

Police said they have not yet established a motive in the fatal shooting of Alexander. "We'll have to wait until we talk to them," Whiting said.

Police did not indicate if a weapon had been found in the Harris' possession. The caliber of the bullet which killed Alexander will not be known until ballistics tests are made on it, Whiting said.

Sheriff Whiting and University Police Chief Richard Brug informed the press Thursday morning they would have important information regarding the Alexander shooting at a news conference scheduled for 3 p.m. Thursday.

Mustang Daily learned at least a hour before the scheduled release of information about the Harris' arrest that Sheriff Whiting personally informed the San Luis Obispo County Telegram-Tribune of the facts of the arrests.

Other reporters at the briefing were disgruntled to learn Whiting had given preferential treatment to the Telegram-Tribune.

When asked why he had given the Telegram-Tribune special consideration, Whiting said it was because the newspaper had a deadline to meet.

Alexander was shot Monday at about 9 a.m. just after he parked his car in lot H-2 near Pepper Lane. A witness said she saw Alexander and two men arguing before one of them shot Alexander in the head, police said. He died Thursday morning.

University police chief Brug said that both he and Sheriff Whiting are certain there is no connection between the shooting of Alex-

ander and the threat discovered two weeks ago on the life of Cal Poly President Robert E. Kennedy.

Brug said the threat that was found by a professor on the wall of a bathroom stall.

He said the note which said something like "The world is insane. Death to President Kennedy," was probably written by a student but a suspect is not expected to be found.

Brug said the university police takes bathroom graffiti seriously when it threatens someone's life.

Norman Alexander dies

Dr. Norman Alexander, director of the university library, died Thursday morning from wounds he sustained in a parking-lot shooting Monday.

Alexander, 49, had been described as neurologically dead by his doctor and was listed in critical condition at Sierra Vista Hospital since the shooting.

Dr. Harold Segal, Alexander's physician, said the librarian showed no signs of brain function when he was brought to the emergency room Monday.

Alexander is survived by his wife, Lois, and three children.

Memorial services are being held 9:30 a.m. Saturday at the Presbyterian Church on Marsh and Morro. The family has asked

donations be made to the Dr. Norman Alexander Memorial Book Fund for the Robert E. Kennedy Library.

Alexander was named director of Cal Poly's library in 1976. Earlier he had been head of library reference at Montana State University and before that assistant to the library director at the University of Minnesota.

Alexander received his bachelor degree from the University of Nebraska and his master degree from the University of Denver. In 1975, he earned his doctorate from USC.

Alexander had been recently elected to chair the Library Directors council of the CSUC system.

Editorial/Opinion

Marvin vs. Marvin

Apparently Michelle Triola Marvin didn't want to play by the rules but now she wants to collect by them.

The case of Marvin vs. Marvin has brought widespread attention to the subject of living together and how to divide up the dough when the unmarital bliss turns blah.

Ms. Marvin and actor Lee Marvin lived together for over five years. They split up in 1970 and now she is trying to collect half of the \$1 million he earned while they were together.

Although we do feel Ms. Marvin has rights, we do think she is wrong in her attempts to collect money from the actor.

In a story in the Los Angeles Times Thursday, Ms. Marvin says she gave up her singing career for the actor. She also became pregnant three times by Marvin and she alleges that two of her pregnancies were terminated at Marvin's request. Her third pregnancy ended in miscarriage.

Marvin should not be blamed for Ms. Marvin quitting her career. It happens quite often that a woman gives up her livelihood for a man. But it isn't the man's fault. Giving things up for a man is a characteristic instilled in women by society. Lee Marvin should not have to pay for a mistake of society.

Unless Marvin held her down and forced her to have the abortions it seems ridiculous for her to blame him for her misfortune. Granted, he may have demanded her to end her pregnancies but she did not have to comply.

Both people made a commitment to each other but they also made the decision to not

get married. As senseless as that piece of paper seems sometimes, a marriage license would have solved many problems.

We make no judgements concerning people who want to live together but occasionally that decision has repercussions. Those repercussions must be thought of when making a decision like this.

Ms. Marvin is being totally unreasonable. It is not as if Marvin left her with nothing. She was offered \$800 a month by Marvin's lawyer in support payments. Ms. Marvin objected saying that was too little money to live on.

It seems this entire episode has turned into a media hype. We are all for Ms. Marvin receiving a reasonable settlement from Marvin but the entire trial is being blown out of proportion.

We wonder if Ms. Marvin had married a local San Luis Obispo policeman or fireman would she be going to all this trouble to collect money from him. This particular case should not be used as an example for any other charges of this kind. It is unique in that Marvin is a wealthy man and any other couple caught in this predicament should not refer to the Marvin vs. Marvin case as the answer.

We think she should have accepted this offer. With no written contract the promises she said Marvin made her nothing.

It is sad sometimes that our society is filled with so many rules and regulations. But it is. Sure, you don't have to play by them but then don't expect to reap the benefits of them too.

Junk in food

How about a nice big spoonful of sodium benzoate, pantothenic acid, magnesium oxide, and copper gluconate?

Those are just a few of the additives found in food, and if we are what we eat, America is in trouble.

Americans eat food that has been preserved, fumigated, texturized, emulsified, bleached, fortified, flavored, dehydrated and rehydrated by industries that are less concerned with public health than with making a profit.

Food technology originally started as a good idea to prevent food from spoiling and stop bacterial diseases, but somewhere the original focus on human health and nutrition was lost. Food manufacturers have given us fantasy foods that refuse to die and cosmetic substances that may look good but have little nutritional value.

The food technologists have come up with all sorts of ways to mechanize our food into packaged products that are appealing to the eye but are not too appealing to our overall health.

A recent report by the House Commerce Subcommittee on oversight and investigations stated the federal government is failing to protect the American public from eating potentially cancer-causing chemicals in much of its food.

The report stated that virtually "all food consumed in this country contains residues of synthetic substances that have been developed in recent decades. Scores of these chemicals have lately been linked to cancer, birth defects and permanent genetic mutations. Still others have never been tested for safety."

The report is alarming, but unfortunately it is probably not alarming enough to end the food manufacturers' obsession with creating synthetic food.

The food technologists see new preservatives as ways of embalming food to keep it longer so more people can buy it. A new dye or texture is seen as a way of enticing the consumer into buying the product. Rarely are the additives viewed as potential cancer causing agents.

It is that no one eats enough of any one of these toxic substances to have it be a significant health hazard, and that just because mice may get cancer from some of these materials, that doesn't mean people will. However, as food additives flood the market, people are not just getting additives from one source but from nearly all their food and the cumulative effect may be devastating.

Several doctors have already linked food additives to illness, allergies, and skin problems as well as hyperactivity and learning disabilities in children.

Surely there is life beyond strawberry flavoring. Is it really necessary to have things like maleic hydrazide — a potentially toxic substance and suspected mutagen — sprayed on stored potatoes to keep them from sprouting?

We would like to see the government more closely regulate the food industry and more toxic additives removed from what we eat. It is time for the food technologists to stop focusing on new ways to shape, disguise, and transform our food and get back to emphasizing health and nutrition.

Who will save us from ourselves?

Letters

Editors:

I have to congratulate the Mustang Daily Editorial Board for their efforts to "bury" "Poly's Treasures: Discover Them" as the 1979 Poly Royal theme. What they said about the 1979 Poly Royal theme which I wrote makes me want to "bury" them. One of the editorials arguments against the 1979 theme was that it is 'unimaginative' and "it starts the open house on the wrong foot." With my own personal hurt feelings aside I think that the Editorial Board would have chosen to practice its criticizing abilities on any theme there might have been. This is a rebuttal to Wednesday's blunt editorial against "Poly's Treasures: Discover Them" and hopefully will encourage thought and speculation about its merits and positive contributions to Poly Royal.

Tom Buckley

Editors:

When I opened my mailbox this afternoon (hoping to find money from home), I discovered a letter addressed to me from "Associated Students, Inc." printed on the outside of the envelope in large, bold type was the phrase "Senior schedule information enclosed." I was interested to know what sort of senior schedule my friends at ASI had in store for me.

What I found inside the envelope was not a senior schedule, but rather a series of flyers and letters urging me to keep my "special appointment" with the yearbook photographer, Image Works. The letter, on ASI stationery, is signed by Larry Robinson and two other ASI officers. This letter reminds me (as if I couldn't read) that "if you are considering the purchase of photographs...Image Works will make the effort to give you a truly great portrait."

by Mark Lawler

Having worked as a photographer for a company like Image Works I know the reason they can lend so much assistance in the preparation of a yearbook is because of the huge profits they make from the sale of senior portrait packages to those they photograph. I wonder how long it has been ASI's policy to promote the profits of private enterprise under the emblem of the non-profit Associated Students. Was the Student Senate consulted before they put our name (ASI) on that advertisement?

If the ASI is honestly acting in my best interest by recruiting me for senior portraits, when why must they use the flagrantly misleading statement "Senior schedule information enclosed?" I am surprised that the ASI has participated in this scheme. How many student dollars were spent to promote Image Works? I am surprised that Larry Robinson would sign his name to such an advertisement. I certainly hope that this is not the type of carelessness that we could expect from him as a member of the city council.

New science hall: Beauty or beast?

BY KATHY MCKENZIE
Daily Staff Writer

People viewing it from the outside often describe it as "a tomb," "like a prison," and "really ugly." Those on the inside call it "convenient" and "great."

The object of their differing opinions, formally known as the Clyde P. Fisher Science Hall and informally known as "Fisher's Fort." It is a solemn grey structure that houses laboratories, lecture rooms, and teacher's offices. It also has the distinction of being the newest building on campus, having opened Aug. 22.

"There's a lot of room," said Ron Baxter, president of Tri Beta, the biology honor society, and a worker in the building's stockroom. "This gives the different disciplines a chance to set up shop. There's special sections for everything."

On the whole, the people who work and teach in Fisher Hall seem to be satisfied with what they have, in spite of the building's outward grimness.

"I like it because they moved me out of a closet and gave me an office with a window," said Gerry Owen, the advising secretary.

"As far as clerical work, it's all here," said Claudia Tatum, a clerical assistant who works on the first floor. "The work area is more convenient everything is in one place."

"I like the elbow room," said Alvin De Jong, who teaches zoology and physiology and has his office in the building. "It was crowded in the old building. There's

a lot of flexibility here. Of course, there's little things that have to be worked out, like the lack of a central stairway from the first to the second floor, and the poor acoustics in the labs, but I like the individual office arrangement."

The man who gets to work out the "little things" in Fisher Hall is James G. Neelands, the supervising equipment technician for the school of science and mathematics.

"The utility of the building is excellent, although people complain about the windows being too small," said Neelands, who is in charge of budgeting, supervising personnel, and facilities planning for the building Fisher Hall. "There were also problems in the beginning. There weren't any chalkboards until October because the company that supplied them was on strike."

Neelands added that there were problems with the heat and ventilating systems, but they were being worked on.

Other items late in coming to Fisher Hall were projection screens, bulletin boards, and lab chairs. Neelands called these small setbacks "normal run-of-the-mill problems."

"We dedicated the building to Dr. Clyde P. Fisher, who was the dean of the science and mathematics. He did a lot to get us the building, and so we got it dedicated to him. We respected him a great deal," said Neelands.

Fisher died three years ago after being the school's dean for 16 years.

Many students are still somewhat unenthusiastic about Fisher Hall.

"It's nice to have — they really needed it," said Ed Cardoza, a biology major, "but you could tell they really cut corners on it. It still looks bare."

Mike Ryan, a mechanical engineer major, was more direct in his observations. "I think it's stupid to paint concrete," he said.

"The concrete looks so impersonal," said Nora Kariya, a dietetics major. "But it's got a great lecture room."

"We have some bugs, but we're working on them," said Neelands. "We're very happy to have this building."

Mustang Daily—Steve Lopez

CONCRETE MONSTROSITY? —The Fisher P. Science Hall, which officially opened last August has received a variety of responses from students,

faculty and staff. Some have objected to its appearance but say the building itself is efficient.

Governor discusses LNG with Indians

LOS ANGELES (AP) — Gov. Brown met in his office here with Chumash Indians opposed to construction of a liquefied natural gas facility at Point Conception in Santa Barbara County, it was recently revealed.

"The Indians tried to impress upon the governor the need for saving the land," said Tom Hayden, who helped arrange the meeting last December.

"Everything went fine," said Indian spokesman Archie Fire Lane Deer of Tuesday's meeting.

Hayden, a Brown appointee to several state energy advisory bodies, said the meeting between Brown and the Indian representatives was preceded by a meeting several weeks ago with Richard Silverman of the governor's office in Santa Barbara.

The Indians have opposed construction of the Western LNG Terminal Associates project at Point Conception,

saying that the site is sacred burial ground.

Meanwhile, in Santa Barbara, local residents and Indian group representatives spoke out against the site at a Federal Energy Regulatory Commission hearing.

Clarification

In an article in Wednesday's Mustang Daily, "Art teachers put talent on display," two quotes were inadvertently put together.

Robert Howell, a photography instructor was quoted as saying:

"The show is more organized and coordinated this year so that it all fits together to make a nice exhibit."

In reference to exhibits from previous years, Howell said:

"The original layout presented fine individual work, but the show itself did not come together as a whole."

GOVERNMENT AGENCIES ARE EQUAL OPPORTUNITY EMPLOYERS

Costs are high to keep Poly's greenery thriving

BY ANDREW JOWERS

Special to the Daily

The trees, shrubbery, and grass sprouting around campus may be nothing more than atmosphere for students, but for employees of the Grounds Department they provide a means of livelihood.

Maintaining pleasant grounds for students to trek from class to class is the task of the Grounds Department, but the cost of keeping the campus green, plants healthy and sports fields playable is high.

According to Rick Ramirez, Cal Poly's budget officer, the personnel salary is by far the most costly factor in the overall expense of maintaining the grounds.

"Including staff benefits, the department's total wage is over \$375,000 per year," Ramirez said.

That money goes to pay salaries for 28 full-time staff members which include a supervisor, a pest control specialist, six equipment operators and tree trimmers, 20 groundworkers, and a

secretary.

"Our major outlay is for replacement plants," said Douglas Overman, the department's pest control and spray specialist. "We spent over \$2,500 last year, with \$600 just on seed."

Plants and trees needing replacement vary from eucalyptus and star jasmines to ground cover such as the ivy around the fire station.

Damage is caused by age, disease and weed invasion, often necessitating replanting whole beds, Overman said. But the most extensive harm is due to students "making a freeway through plants, turning beds into a desert. It doesn't take long," he said.

About \$3,000 a year is spent on fertilizer and pest control chemicals; but water, at 18 cents per hundred cubic feet, is not a major expense despite the large acreage requiring four to nine inches irrigation a year, according to Overman.

The department has one dump truck, two pickups, a high-ranger for trees and five small tractors. Repairing these, miscellaneous spending, and the cost of supplying the grounds equipment — including shovels, rakes, wheelbarrows, and hoes — all adds to the costs of the Grounds Department.

Material expenses for the department are covered by on-campus housing and parking fees. Wages are paid from Cal Poly's general budget.

Mustang Daily—John Schultz

Organized labor gives support to LNG site at Point Conception

SANTA BARBARA (AP) — Support from labor leaders emerged in Thursday's federal hearings in the proposal to place a liquefied natural gas tanker terminal at Point Conception.

A representative of the State Coastal Commission also spoke, reminding administrative law judge Samuel Gordon that the State Public

Utilities Commission did not speak for all state agencies when it granted a conditional permit for Point Conception.

The three days of hearings, which ended Thursday, have been dominated by testimony against the proposed gas facility, which gas companies say will provide 20 percent of California's supply in the 1980s.

But organized labor supported the Western LNG Terminal Associates' proposal to build the \$600 million facility at Point Conception.

William R. Robertson of the Los Angeles Federation of Labor, AFL-CIO, told Judge Gordon that California faced "major crises in three or four years if we don't get the siting at Point Conception."

Computer Science & Engineering Graduates (Aeronautical ★ Electrical ★ Mechanical)

You've worked hard to get your degree.
You deserve the best.

**REWARD YOURSELF
...WITH LOCKHEED,
on the beautiful San Francisco Peninsula.**

Our representative will be on campus
Thursday, January 25

Lockheed Missiles & Space Company has opportunities for talented and dedicated professionals eager for challenge, responsibility and the rewards to match. We're involved in meaningful programs in such diverse areas as ocean systems, space systems, energy and environmental systems, remotely piloted vehicles, and information systems.

We're located in one of the most beautiful areas in the nation — Sunnyvale, California, where year 'round pleasant weather, great outdoor activities, and the cosmopolitan lifestyle of San Francisco and San Jose are just short drives away. The benefits are great, the career growth opportunities even greater. Sound interesting? If so, then investigate the exciting opportunities available now for COMPUTER SCIENCE & ENGINEERING GRADUATES (Aeronautical ★ Electrical ★ Mechanical).

Our representative will be here
Thursday, January 25

If unable to contact our representative, please forward your inquiry to College Recruiting Manager, P.O. Box 504, Sunnyvale, CA 94086. We are an equal opportunity affirmative action employer.

I WAS A PUNK BEFORE YOU — The music and theater of the Tubes will be at the Old Waldorf in San Francisco, Jan. 19-20.

Nicolette Larson in the right place

HOLLYWOOD (AP) — Nicolette Larson says the only calculated step she ever took toward becoming a professional singer was to move from her native Kansas City to California.

From then on, she says, "I think it was really a case of being at the right place at the right time."

Now that may sound like the king of cultivated false modesty that looks good in

the fan magazines. But when it comes from Miss Larson—a mere slip of a girl-next-door with a great smile and dark brown braids down to you know where — well, it's hard not to believe.

Good things have been happening so quickly to this 26-year-old that perhaps she simply hasn't had time to develop a healthy Hollywood ego.

Her debut album,

"Nicolette," has been out all of four months but is on the verge of being certified gold. Her voice is positively flooding the airwaves, both on cuts from her own album — "Lotta Love" and "Rhumba Girl," to name two — and in duets from Neil Young's "Come A Time." Within a week of her first live solo performance she was named the tope female vocalist of 1978 by Rolling Stone

magazine.

Not bad for someone who says her fondest goal in moving to the West Coast was to sing background harmony and maybe just maybe — get to do a road gig with a star.

Nicolette is asked to enumerate some of the right places she happened to be in at

the right times.

"I was at a rehearsal hall, and Hoyt Axton was looking

for a singer and one of the guys had heard me singing in the hall," she replies.

"YOU ONLY LIVE TWICE"

"ON HER MAJESTY'S SECRET SERVICE"

Expand your horizons with TRW VIDAR

We're expanding our horizons . . . and we'd like to invite you to play a significant role in our continuing growth!

Vidar, a major Division of TRW, is engaged in the development, manufacture and marketing of digital telecommunications products and systems for the telephone industry — worldwide.

Because of significant product expansion, we have current opportunities for bright, enthusiastic Electrical Engineers and Computer Scientists with a BS, MS or Ph.D.

Our benefits program is among the best — you'll find our educational assistance program extremely attractive: 100% reimbursement for tuition, fees and books for work related courses. In addition, we have a unique Work/College Program which allows continuing education while on a reduced work schedule.

Interested? Let's talk about it!

WE WILL BE INTERVIEWING ON YOUR CAMPUS

Friday, January 26

Please Contact your College Placement Office to arrange interview.

BUT . . . you don't have to wait . . . you can visit our nearby facilities for a relaxed, informal discussion at your convenience. Drop your resume in the mail today to Richard M. Duncan, Senior Personnel Representative:

Netters meet Gauchos in Santa Barbara

BY BRIAN CARDELLO
Daily Staff Writer

With a solid core of returning players, and a deep well of young talent, Cal Poly's Men's Tennis team is ready for its season opener this Saturday against U.C. Santa Barbara.

"We have an excellent team," said coach John Crivello. "We have a good chance to win league this year."

Lyle Chamberlain, a senior from Escondido, filled the No. 1 spot on the team last season with a 13-10 record. He joined Ron Peet, also an Escondido senior, with a 16-5 record, to make a fine doubles team that finished the year with a record

of 20-3. Peet was the No. 2 man last season.

Coach Crivello is enjoying his first season as Cal Poly's tennis coach. He wants to motivate and support the squad, while giving the players an opportunity to reach their full potential.

Crivello feels that it is important to keep the future in mind when choosing players for the team. He has done this by retaining young talent on his team: Robert Chappell, Modesto sophomore; Martin Dydell, Santa Maria freshman; Brian Wright, Napa freshman; and Jeffrey Post, a Miraleste freshman, are expected to add depth to the team.

In the match against U.C. Santa Barbara, No. 1 man will be Brad Faltermeier, an Irvine junior; No. 2 will be Chamberlain; No. 3 will be Ron Berryhill, an Arroyo Grande junior who played in the no. 6 spot last season; No. 4 is William Terre, a Torrance senior; No. 5 will be Kenneth Ueltzen, a Cupertino freshman; and No. 6 will be Alan Vieweg, a Miraleste freshman.

Crivello says U.C. Santa Barbara is a good division 1 team, and that the match will help him to evaluate the team members, in preparation for future opponents.

On Sunday, we'll be watching

LOS ANGELES (AP) — NBC is getting stiffed in the ratings. It faces dismal prospects for the near future. But for one day, at least, the No. 3 network has the only show in town.

This isn't a holiday. It's a

national obligation.

The feast starts Saturday with "Super Bowl Saturday Night," an inane variety-type show in which athletes and actors sing and dance and do other things people wouldn't ordinarily watch them do. This

gives O.J. Simpson the opportunity to show that, as a TV star, he's still the greatest running back of all.

Them, when you're still clearing the sleep from your eyes Sunday morning, NBC is waiting in your living room, beckoning you to the tube. Dick Enberg, who should be calling the game, hosts 1 and a half hours of Sports World, followed by two hours of football junk. They think we'll sit and watch 3 and a half hour of pre-football football. We will.

Gymnasts meet tonight

BY CHUCK SCHULTZ

Special to the Daily

Cal Poly's Women's Gymnastics team is expected to give the University of California at Riverside team a run for their money when the two go head-to-head in a three-way meet here Friday night.

According to Andy Proctor, the Mustangs gymnastics coach, if his team is healthy, and "we get some lucky breaks" there is a good chance they will beat Riverside.

The two teams were nearly equal in total points during pre-season play, Proctor said.

Beset by last minute injuries, and forced to scratch two events, the Poly team was overpowered by Sacramento

State in a non-conference meet at Sonoma State University on Tuesday. Sacramento State racked up a total of 115 points, Cal Poly 83 and Sonoma State 57 in that meet.

Two members of the Poly team who were unable to compete in Tuesday's meet because of injuries are both expected to return to action on Friday, Proctor admits, though, that chances "will be hurt if they are not ready to go."

This is only the second season that Poly has had a women's gymnastic team.

Proctor feels that this year's team is stronger than last year's team because it has more depth.

"We are able to compete up to six people per event," he said.

He stressed that even though individual scores may not be the highest, total scores for the team in any one event are likely to be strong because of such depth.

Proctor is a 1971 graduate of Cal Poly. After serving two years in the Army, he returned to Cal Poly in 1973 to teach gymnastics. He has been the women's coach since the team's inception in 1977.

Tonight's meet begins at 7 p.m. in Crandall gymnasium and on Saturday at the same place the Mustangs host powerhouse Cal State Northridge at 3 p.m.

Angels and Carew agree

ANAHEIM Calif. (AP) — The California Angels have reached contractual agreement with Rod Carew, the American league team announced Thursday. The Angels still must make a deal with Minnesota before acquiring the Twins' seven-time American League batting champion.

No terms of the agreement with Carew were announced, but the 33-year-old first baseman was reportedly ask-

ing for a multi-year contract calling for some \$4 million.

Buzzie Bavasi, the Angels' general manager, worked out the terms of the contract with Carew and his attorney, Jerry Simon.

The Angels have reportedly offered Minnesota outfielder Ken Landreaux, infielder Dave Chalk and left-handed pitcher Ken Brett for Carew. Other Angel who might also figure in the trade are right-handed pitchers Paul Hartzell and Dyar Miller, plus some

minor leaguers.

The deal could hit a snag over third baseman Carney Lansford, who batted .294 as a rookie for the Angels last season. The Twins have expressed an interest in Lansford, but the Angels said he would not be part of a package for Carew.

Carew, who would have become a free agent at the end of the upcoming season if he'd remained with Minnesota, had asked the Twins to trade him.

Strike force eyes SuperBowl

MIAMI (AP) — Miami police say a special anti-terrorist strike force will keep an eye on the Goodyear blimp and the Orange Bowl during the Super Bowl on Sunday. But there have been no threats yet, they say.

"The whole point of terrorism is publicity. A disruption of the Super Bowl

would be a big plus for any of those terrorist groups," said Capt. Mike Gosgrove, who will coordinate the special force. The police say they are aware of CBS-TV's promotion for the movie "Black Sunday," about a terrorist group's suicide mission in the blimp during a National Football League Championship game.

The movie will air shortly after the game this weekend.

Mustang Daily—Vince Bucc

FACE! — Cal Poly forward Mark Robinson rejects a shot in a recent game with Fresno State. The 6-foot-6

junior from Altadena will be trying along with the rest of the club to get their first CCAA win tonight.

Cagers seek CCAA win

Cal Poly plays its first California Collegiate Athletic Association games of the season at home this weekend hosting UC Riverside tonight and Cal Poly Pomona Saturday.

The Mustangs are 8-8 on the season after a 5-0 beginning. But nine of the team's last 11 games have been on the road. And Cal Poly has been able to register just two wins in the nine away games played thus far this season.

"We just must play harder for the full 40 minutes of play," groaned coach Wheeler.

"Our players just have to learn that playing in the CCAA is tougher than games in the pre-season. We have been ahead or close at the half in just about every game only to get blown out in the second half. I don't know whether it's fatigue, lack of concentration or what."

Sophomore Dave McCracken from Morro Bay is being given a starting assignment at forward. It's a role he has handled only four times previously this season.

Freshman Craig Bowlin, 6-foot-5 forward from Pasadena's Blair High School, is scheduled to see increasing amount of playing time. In last weekend's conference games he shared the scoring lead in the losses to Cal State

Northridge and Cal State Los Angeles with 10 and 12 points, respectively.

"Craig adds a different dimension to our ball club. He rebounds. He works hard and he gives us more scoring power," coach Wheeler noted.

"We are facing some strong competition this weekend.

Riverside, (12-1), is ranked 12th nationally in Division II and Cal Poly Pomona, (6-8), may have the best talent in the league."

"If we can win a pair, we are back in the conference basketball race. A pair of losses will knock us out of the championship," added Wheeler.

FILM FESTIVAL

Co-sponsored by Extended Education, the English Department and the Cal Poly Alumni Association

Films will be shown on campus in the Cal Poly Theatre.
Seating is limited to 500, available on a "first-come, first served" basis.

SHOW TIME: 7:30 p.m. SHOW TIME: 7:30 p.m.

Swimmers to compete

Cal Poly's women's swim team travels south this weekend to the Cal State Los Angeles campus for tri-meet competition.

The Mustangs are coming off a stunning victory over the UC Irvine Anteaters in which eight Cal Poly records were broken.

Along with Los Angeles and Cal Poly, sister school Cal Poly Pomona will bring their team.

The meet begins at 2 p.m. this afternoon and the Mustangs are favored to win the contest.

Heather Davis, Poly's top performer in the meet with Irvine breaking four records, is expected to put in some quick times in 100-yard freestyle and 200-yard freestyle.

The women are 1-1 on the season so far this season losing to UC Santa Barbara in their first meet.

Freshman Kelly Kerrigan

and juniors Karen Kinaman and Traci Serpa will help out Davis in the 400-yard medley.

Serpa took nearly a second off her last time in the 50-yard

freestyle and according to coach Kathy Bartels she'll probably be taking more seconds off as the season progresses.

CAMPUS REPRESENTATIVE WANTED

Pacific Beverage Co., distributor of Budweiser, Michelob, Michelob Light and Natural Light, is looking for a representative, male or female, to coordinate associated college promotional programs and represent the brands in the college community.

The ideal applicant is 21 or older, junior, has automobile and can spend an average of 5 - 6 hours per week. Apply in person 1633 Carlotti Dr., Santa Maria.

BART blaze injures 52

OAKLAND (AP) — Fire investigators combed the charred remains of a Bay Area Rapid Transit train Thursday for the cause of a blaze which killed one fireman and injured dozens of persons, while thousands of commuters struggled to get to San Francisco in crawling buses and cars.

Traffic was reported backed up at least six miles on some East Bay freeways feeding the eight-mile-long Oakland-San Francisco Bay Bridge. More than 60,000 riders ride BART through the tube daily.

The smokey commute-hour fire Wednesday evening, in a San Francisco-bound train speeding under the bay from Oakland, killed a veteran Oakland fireman and injured 33 others, 23 of whom were still hospitalized this morning. At least 52 persons, including the firemen, were reported injured and at least 32 persons were hospitalized.

The fire hit at about 6:15 p.m. near the back of a speeding train after what witnesses described as a flurry of sparks, flashes and explosion-like sounds on the westbound BART tracks inside the 3.6-mile steel-encased bore.

Two hours earlier, a similar series of sounds and flashes shocked passengers on another train.

Governor sworn in early

NASHVILLE, Tenn. (AP) — Lamar Alexander became Tennessee's governor Thursday taking over in an unprecedented and abruptly arranged ceremony. He immediately ordered a halt to the release of prisoners pardoned by his predecessor.

Ousted three days early was Ray Blanton, the 48-year-old Democrat who stepped into a political hornets' nest when he granted clemency to 24 convicted murderers and 28 other convicts this week. Between six and 10 of those convicts have left prison since Blanton acted.

Upon assuming the duties of governor Wednesday, Alexander ordered that no one of the prisoners are to be released "without a properly executed document with my signature."

The surprise swearing-in came amid reports that a grand jury would investigate the pardons and commutations granted by Blanton.

Blanton's action Monday came a month after the arrest of two of his aides and a state trooper on federal charges of seeling pardons and paroles. A federal grand jury is investigating the alleged scheme.

Blanton, who was not told of the oath-taking ceremony in advance, said he was "saddened and hurt for the state of Tennessee that this clandestine action has taken place...There is such a thing as courtesy. I thought they would have the courtesy to tell me."

Iranian envoy rejected

TEHRAN, Iran (AP) — The new Iranian government sent an envoy today to seek peace with Ayatollah Khomeini, its most dangerous enemy, but aides to the Moslem holy man said he would not negotiate with the emissary and he also rejects President Carter's call to give the new government a chance.

Clashes between demonstrators and soldiers loyal to Shah Mohammad Reza Pahlavi continued for a second day Thursday and between seven and 21 persons were reported killed. The worst bloodshed was in the southern town of Dezful,

where troops reportedly rammed automobiles with their tanks to rout protesters.

U.S. Air Force planes evacuated 17 Americans, mostly military advisers, from an air base near Dezful and brought Tehran, a U.S. military spokesman said. Many of the anti-shah protests have been bitterly anti-American as well.

Lawsuit filed against UC

SACRAMENTO (AP) — A lawsuit was filed Wednesday accusing University of California regents of illegally spending public money to develop harvesting machines for the benefit of agribusiness.

The suit by California Rural Legal Assistance claims that tax monies are being used to benefit a few farmers, that thousands of farm workers have been driven onto welfare, that hundreds of small farmers have been driven out of business, and that consumers are being forced to eat produce that has to be tough enough for machine harvesting.

CRLA, a non-profit group which often represents farm workers also charged that at least six regents won farm property or have personal investments that could benefit from farm machinery developed at UC, and that individual university researchers have profited from royalties on sales of the machines developed at UC.

UC has fought state attempts to impose financial disclosure and conflict-of-interest standards that would reveal, among other things, the corporate ties of regents and top administrators.

Carter accused by Brown

SACRAMENTO (AP) — Gov. Edmund Brown Jr. Thursday accused President Carter of using "scare tactics" when Carter criticized Brown's proposal for a constitutional convention to prohibit federal budget deficits.

The Democratic governor responded to remarks Carter made Wednesday at a news conference where he said the sort of convention Brown endorsed would be "extremely dangerous."

Brown said that remark was "more in the nature of scare tactics" which are not warranted.

"The scare image of the convention is not accurate," Brown added. "I categorically reject the labels and phrasing of the President."

Carter cited concerns voiced by liberals who say they fear a convention to amend the U.S. Constitution could undercut the civil liberties guaranteed in the Bill of Rights.

Carter said such a convention "would be completely uncontrollable, that the Constitution could be amended en masse with multitudes of amendments..."

Brown, who has not ruled out a campaign against Carter next year for the Democratic nomination, responded at his own impromptu news conference that he was convinced a constitutional convention could be limited strictly to the issue of a balanced federal budget.
